PRODUCT OVERVIEW

QN-O-490 built-in with smart antenna and MU-MIMO technology provide high data rates even in high-density and high-interference environments. SFP backhaul port allows service providers to backhaul data over fiber without the need for additional hardware devices to convert Fiber to Ethernet.

QN-O-490 is manageable through a centralized platform and supported by Quantum Rudder. QN-O-490 can also be deployed as a standalone access point.

Each access point comes with a one-year limited liability manufacturer's warranty from the date of activation and theft prevention functionality to protect assets from misuse.
