This Quick Setup Guide provides step-by-step instructions on how to set up Quantum Networks Access Point. After completing the steps described in this Guide, you will be able to install the Access Point (AP) on-site and provide wireless network access to users.

Glossary

| Feature | Description | | | |
|-----------------|---|--|--|--|
| Management Mode | Standalone: In this mode, each device is configured a managed individually. It can be useful in scenarios with | | | |
| | devices or sites with limited Internet access and basic features. | | | |
| | Cloud: In this mode, devices are configured and managed | | | |
| | from a central controller hosted in the cloud. It offers many | | | |
| | more sets of features as compared to the Standalone mode. | | | |
| Operation Mode | Bridge: In this mode, the device connects to a network of | | | |
| | an ethernet cable and extends the coverage over wireless. | | | |
| | Router: In this mode, the device connects to Internet Service | | | |
| | Provider directly using DHCP / Static IP / PPPoE protocols | | | |
| | and shares Internet access over a wired or wireless network to | | | |
| | users. | | | |
| Quantum Rudder | Quantum Rudder is a cloud-hosted controller which can be | | | |
| | used to configure, manage & monitor devices associated with | | | |
| | it. It can be accessed from https://rudder.qntmnet.com | | | |

Icon description

| Icon on GUI | Description |
|-------------|--|
| 0 | Click to get the option for the firmware update. |
| * | Click to get back to the home page. |
| 0 | Click to check the documentation. |
| (î; | Click to check device information. |

Your Quantum Networks Access Point can work in **"Standalone Mode"** or can be managed by **"Rudder"**.

Package contents

- Access Point.
- Mounting kit

Prerequisites

- Internet access.
- Desktop / Laptop / Handheld device.
- 802.3af / 802.3at PoE Switch / PoE Injector.
- 12V, 2A DC power adapter.

Network requisites

The listed ports must be opened or allowed in the network firewall.

- TCP: 80, 443, 2232, 1883.
- UDP: 123, 1812, 1813.
- Allow rudder.qntmnet.com and reports.qntmnet.com in the destination field.

Connect Access Point

- After unpacking Access Point, connect it to an Internet source.
- Plug-in Ethernet cable of Access Point.
- Power on Access Point by using 802.3af / 802.3at PoE Switch / PoE Injector.

Note: Access Point must have Internet access during initial setup for the first time to activate the device, warranty and support.

Step 1 – Create new account on Quantum Rudder

- Browse <u>https://rudder.qntmnet.com</u>.
- Click "Create New Account" to sign up for a new account.

| | DER Services Controller | 8 |
|------------------|----------------------------|-----------|
| | 🔒 Sign up | |
| Administrator | First Name | Last Name |
| Email | Email | |
| Phone | = • phone | |
| Country | India | Ŷ |
| Timezone | Asia/Kolkata(GMT4 | 5:30) |
| Password | | 0 |
| Confirm Password | Confirm Password | 0 |
| | Register | |
| | | Logi |

Figure 1

- Follow the steps as guided on the screen for Registration.
- Verify Quantum Rudder account from registered email id. (you will get)
- Once the account gets validated, it turns the page to "Add License Key" (User will get the license key from respective (Partner / Resource))
- Account on Quantum Rudder (Quantum Networks Cloud Controller) is now ready to use.

Step 2 - Basic setup

- Connect the WAN port of the Access Point to the network with Internet access.
- You should see a new wireless network with SSID QN_XX:XX (where XX:XX are the last four digits of Access Point MAC Address).
- Connect to QN_XX:XX SSID and browse Access Point's default IP "169.254.1.1".

Let's start the configuration.

On the configuration start page, it will display,

- Device model number
- Serial number
- MAC address
- Current firmware

Note:

- Click ¹ button to get the option to "change the firmware" if required.
- Click Change Firmware to update firmware if required. Select the firmware file from the respective location and update it.

Step 3 - Setting up device IP address

Click "**Configure**" and set the device IP address by selecting the required options.

- Connectivity Mode Select the connectivity mode.
- Protocol DHCP, Static or PPPoE
- Interface Select interface
- VLAN Assignment- Enable parameter. Enter VLAN ID and click "Fetch IP Address" to get the respective IP in case of VLAN setup is required.

| Oevice IP Address | \rightarrow | Connectivity Mode Ethernet |
|---|---------------|--|
| Connectivity Mode Ethernet | ~ | Ethernet USB DHCP |
| Protocol DHCP | ~ | Protocol V DHCP V |
| nterface eth0 | ~ | DHCP Static PPPoE |
| VLAN Assignement 1 Fetch I IP 192.168.7.40 | P Address | Interface eth0 eth1 eth2 |
| Subnet 255.255.255.0 | | eth3 |
| Gateway 192.168.7.1 | | Note: As per the Access Point specifications -Connectivity Mode, Protocol and Interface options will come. |
| Primary DNS 192.168.7.4 | | Select the options as per the requirement. |
| Secondary DNS | | |

Figure 3

Click "Proceed" to apply configuration and turn to the next page.

Step 4 – Set the management mode

Management Mode

Quantum Networks Access Point can be configured in two modes:

Rudder (on cloud / on-premise)

Centralized management of Access Points using Quantum Rudder **Standalone**

Independent management of each Access Point

| Management Settings |
|---|
| Rudder Standalone |
| Enter Quantum RUDDER Login Credentials |
| Email Jhon@blick.com |
| Password 🔹 |
| RUDDER URL / IP Address https://rudder.qntmnet.com |
| G Back Proceed O |

Figure 4

Step 5 - Access Point quick setup in Rudder Mode

• Select "Management Mode" as "Rudder", enter Quantum Rudder login credentials and click "Proceed".

| Management Settings Rudder Standalone | |
|---|--|
| Enter Quantum RUDDER Login Credentials Email Jhon@blick.com | |
| Password (| |
| RUDDER URL / IP Address https://rudder.qntmnet.com | In the case of on-premise RUDDER, mention the local server IP Address/URL assigned to RUDDER, here. |
| Figure 5 | <u></u> |

• It will verify the credentials, and turn to a next page.

Figure 6

- Upgrade QNOS version by either downloading from the cloud or by selecting manually from respective location and upgrade or click "**Skip Upgrade**" to move further.
- The user will turn to a page where the user has to select the site and AP group.

| | # 0 🕏 |
|--------------------------------|--------------|
| 🌣 RUDDER Setu | p |
| Select Site Quantum HO | ~ |
| Select AP Group Head office | ~ |
| G Back | Proceed 📀 |

Figure 7

- Select Rudder site and AP Group where Access Point's needs to be added and click "**Proceed**".
- If the selected site is already having another Access Point, it will automatically configure AP in a bridge mode and will turn the user on the summary page after clicking **"Proceed"**. (Figure 8)
- If this is the first Access Point for the selected site the user will turn on the page, where the user can select Access Point Operation mode as **Bridge** or **Router**. (Figure 9)
