QSMP

Wi-Fi Service Management Platform

Manage Wi-Fi Deployment At Scale

QSMP is a cloud delivered platform providing 360 degree Wi-Fi Service Management for various enterprise/service providers. It is super scalable, easy to deploy and can manage thousands of users at different hotspots from a single, central operation centre. It is a secure service, entirely delivered, operated and maintained from cloud.

- Flexible Onboarding
- Manage QoS
- Issue Invoices
- Collect Payments

TRANSFORM YOUR GUEST WIFI EXPERIENCE

- QSMP simplifies and aligns the process of onboarding your guests on Wi-Fi network. Whatever your onboarding process, QSMP can be configured to adopt the workflow without any programming effort.
- Create amazing splash pages from the template library.
